

MICROPROCESSOR KARL FISCHER MOISTURE TITRATOR MODEL NO - ALE-907

MICROPROCESSOR KARL FISCHER MOISTURE TITRATOR MODEL NO - ALE-907

This apparatus is designed for determination of moisture content in solid / liquid samples. Moisture of sample is titrated with Karl Fischer reagent which is added precisely by a motorized pumping system. End point is detected automatically and indicated by audible alarm and LCD display.

Applications

- Pharmaceutical Industry
- Chemical Industry
- Petrochemical Industry
- Oil & Lubricant Industry
- Food & Beverage Industry
- Cosmetic & Personal Care Industry
- Paint, Ink & Coating Industry
- Plastic, Polymer & Resin Industry
- Transformer Oil & Power Industry
- Research Laboratories & R&D Centers

Features

- Motorized dispensing of KF Reagent (No Glass Burette)
- Digital Display of KF consumed with readability of 0.01ml
- Easy calibration of dispensing pump by front panel keys
- Memory for recording K F consumed.
- Inbuilt magnetic Stirrer with variable speed
- Programmable Delay Time and Buzzer on Time
- Motorized reagent washing from tubing after analysis.
- RS232 port for serial Printer attachment

MODEL NO.	ALE - 907
Measuring Method	Karl Fischer titration method
K.F. Dispensing	Highly sensitive motorized dispensing
Display	2*16 character LCD
Volume Display & Range	Digital, 00.00 ml to 99.99ml
Minimum Volume Readability	0.01ml
End Point Detection	Automatic with dual platinum sensor
End Point Indication	Display & Audible alarm
Function Keys	Soft touch 6 keys
Stirrer	Inbuilt magnetic stirrer with variable speed
KF Back Flush after Analysis	Yes, Motorized
Error Message	Yes for bad sample or reagent
Data Storage (KF Consumed)	Yes with date & Time
Printer Interface	Yes, RS232 for serial printer attachment
Standard Supply	Dual Platinum sensor, Reagent bottles with adapters, Titration bottle, Magnetic rotor, Set of Dispensing tubes, Set of connecting tube
Weight	10 kg. (Approx.)

Note: Technical Specifications, Appearance & Model number are subject to change without prior notice.
