

MICROPROCESSOR AUTO PH METER MODEL NO. ALE-856

Microprocessor Auto pH Meters are ideal instruments for determination of pH and mV value of any aqueous solution. They use the latest microcontroller technology to provide the most accurate readings on the 3½ digit display. The instrument can be calibrated by using up to 3 point calibration on the click of a key. They have the facility of auto buffer recognition. The calibration is retained in the memory even after the instrument is switched off. The temperature compensation facility, both automatic and manual is available. These are extremely useful instruments for agriculture and soil analysis laboratories, swimming pools, fertilizer plants, chemical industries, pharmaceutical industries, petroleum refineries, textile plants etc.
